

MIDWEST[®] SNIPS

Instructions for the
Vinyl Fence Nibbler
Part no.
MW-7/8VFPN

To Use:

Orient nibbler so the cutting blades are facing down. Spread the handles apart before putting the tool into the post hole. Place the tool's nose (illustrated in red) into the post's hole and settle the cutting blades over the hole's bottom edge. Make sure the nibbler's shoulders (illustrated in light blue) are flush against the post.

Squeeze handles together to make the cut in the post hole. Repeat process if a larger opening is needed.
